SKILLS

Game Dev: Unity 6, URP, Prefabs & variants, ScriptableObjects, New Input System, ProBuilder, Splines, post-processing

Languages: C# (primary), Java 17+, SQL (PostgreSQL)

Core: OOP, SOLID basics, clean architecture habits

Tools: Git, GitHub, Unity Editor, Rider / Visual Studio, Docker (basic)

Additional: REST APIs, Spring Boot, basic TypeScript/JavaScript

LANGUAGES

English: B1 (actively improving)
Russian / Belarusian: Native

AVAILABILITY

Unpaid internship: Yes
Full-time: Yes (office / hybrid)

Dana Stukalova

Junior Unity Developer

SUMMARY

Junior Unity Developer with a strong OOP foundation and hands-on experience designing game logic in C# and Java. I have built **four Unity 6 (URP) portfolio projects**, all published on GitHub with screenshots and documentation. Looking for an internship or junior role on a Unity team to grow as a gameplay programmer.

GAME DEVELOPMENT (UNITY)

WonderDoor | Unity 6, URP, C#

GitHub: github.com/top-secret666/WonderDoor

- First-person exploration of surreal rooms linked by magic doors: a corridor of coloured doors, a sunlit meadow, an arc hall with warm lamps
- Prefab / prefab-variant hierarchy, ProBuilder and Splines geometry, interactable doors, procedural meadow

Backrooms Lab: Level 0 | Unity 6, URP, C#

GitHub: github.com/top-secret666/backrooms

- Atmospheric first-person Level 0 slice with flickering fluorescent lights and a flashlight
- Rigidbody FPS controller with ScriptableObject configs, event-based noise system, New Input System

The Witcher: Moonlit Road | Unity 6, URP, C#, pixel art

GitHub: github.com/top-secret666/witcher

- Dark-fantasy pixel-art pitch demo: a parallax forest road that gradually reveals a moonlit castle
- Layered parallax rig, CPU-projected road, custom URP retro renderer feature

Witcher 02: Night Ride | Unity 6, URP, C#, pixel art

GitHub: github.com/top-secret666/witcher-02

- Pixel-art night horse ride through fog and roadside pines towards a castle
- Layered parallax, perspective road, walk / canter / gallop gaits with camera motion

OTHER PROJECTS

The Witcher: Core Logic Engine | Java 17, OOP

GitHub: github.com/top-secret666/the-witcher

- Modular game logic system built with OOP: entities, interactions, rules, game state

Food Delivery Platform | Spring Boot, Kafka, Keycloak, Next.js

GitHub: github.com/top-secret666/food

- Microservices backend with REST APIs, Keycloak / OAuth2, Kafka, and Docker Compose

Genomic Data Analysis (Neural Network) | Python, TensorFlow/Keras

GitHub: github.com/top-secret666/Analiz

- **Award:** Winner of the Scientific and Technical Conference
- Co-developed a neural network model that assesses cancer risk from genomic data

EDUCATION

Vitebsk State Technological University (VSTU) | 2023 – 2027 (expected)
Faculty of Information Technologies and Robotics (FITR)
Specialization: Information Technologies; qualification: Software Engineer
