Dana Stukalova

Junior Unity Developer

Open to internships and junior roles · Vitebsk, Belarus · Ready to work in Minsk

stukalovadana20@gmail.com · +375 29 271 09 32 · github.com/top-secret666 · CV: EN / RU

SUMMARY

Software engineering student at Vitebsk State Technological University focused on Unity game development. I build gameplay systems in C# on Unity 6 (URP): four portfolio projects covering first-person exploration, atmospheric lighting, parallax and custom renderer features — all published on GitHub with documentation. I also shipped a Java pixel-art game with a public Windows release. Looking for an internship or junior Unity role in Minsk where I can grow as a gameplay programmer on a team.

SKILLS

Game Dev: Unity 6, URP, C#, Prefabs and prefab variants, ScriptableObjects, New Input System, ProBuilder, Splines, post-processing, editor tooling, basic physics and UI

Languages: C# (primary focus), Java 17+, SQL (PostgreSQL)

Core: OOP (encapsulation, inheritance, polymorphism), SOLID basics, clean architecture habits

Tools: Git, GitHub, Unity Editor, Rider / Visual Studio, Docker (basic)

Also used: C++ (SFML), Python (TensorFlow / Keras), REST APIs / Spring Boot (personal projects), basic TypeScript / JavaScript

GAME DEVELOPMENT (UNITY 6, URP, C#)

WonderDoor

Unity 6, URP, C#, ProBuilder, Splines

github.com/top-secret666/WonderDoor

- Surreal first-person walk through giant corridors of coloured doors, a circular arc hall and a sunlit meadow room.
- Prefab / prefab-variant room hierarchy, interactable hinge doors, procedurally generated meadow, layer-limited window sunlight, and post-processing configured from code.

Backrooms Lab: Level 0

Unity 6, URP, C#, New Input System

github.com/top-secret666/backrooms

- Atmospheric first-person slice of Backrooms Level 0 with flickering fluorescent lights and a broken flashlight.
- Rigidbody FPS controller tuned through ScriptableObjects, event-based noise system (Observer), per-lamp flicker via MaterialPropertyBlock, and editor tools that build the level.

The Witcher: Moonlit Road

Unity 6, URP, C#, pixel art

github.com/top-secret666/witcher

- Dark-fantasy pixel-art walk along a forest road that gradually reveals a moonlit castle.
- Walk-driven parallax rig, CPU-projected perspective road, custom URP ScriptableRendererFeature for the retro look, and mood presets in ScriptableObjects.

Witcher 02: Night Ride

Unity 6, URP, C#, pixel art

github.com/top-secret666/witcher-02

- First-person night horse ride through fog and roadside pines towards a castle.
- Layered parallax, perspective road with steering, walk / canter / gallop gaits with camera motion, and URP post-processing; adapts to any aspect ratio.

OTHER PROJECTS

- **The Witcher: Chapter 1** (Java 17, Swing). Pixel-art horror visual novel on a small custom engine with MVP architecture. Windows build with bundled JRE (v1.1.0).
- **Aroma Food Delivery Platform** (Java 17, Spring Boot 3, Kafka, Keycloak, PostgreSQL, React). Full-stack microservices app with JWT / Google / Keycloak auth and a live demo.
- **Tournament Arena** (Java 17, Spring Boot, JWT, MySQL, Next.js 15). Study project: League of Legends tournament management with REST API and a React interface.
- **Genomic Data Analysis** (Python, TensorFlow / Keras). **Winner of a scientific and technical conference.** Co-developed a 1D CNN that classifies pathogenic RB1 gene mutations using ClinVar data.
- **Fireboy & Watergirl Multiplayer** (C++17, SFML, TCP). Coursework: co-op platformer with an authoritative server and a custom network protocol.
- **PromptLock Defender** (Python). Conference project: antivirus detecting AI-powered ransomware with seven detection modules.

EDUCATION

Vitebsk State Technological University (VSTU), 2023 – 2027 (expected)

Faculty of Information Technologies and Robotics · Major: Information Technologies · Qualification: Software Engineer

LANGUAGES

English: B1 (Intermediate), actively improving spoken and technical English

Russian, Belarusian: native

AVAILABILITY

Unpaid internship: yes · Full-time: yes · Office or hybrid · Ready to work in Minsk
